ACADEMIC CURRICULUM VITAE · 2026

Tuotuo (Talia) Yang 杨拓拓

M.A. Student in Design Studies | Information & Interaction Design

Research interests: digital cultural heritage, mixed reality, embodied interaction, and AI-assisted design

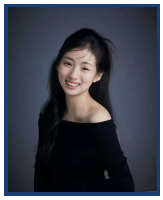

Phone +86 188 0105 4548

01 EDUCATION

Shanghai Jiao Tong University · School of Design 2026.09—2029.06

Academic M.A. in Design Studies | Information & Interaction Design

Recommended Admission · Ranked 1st in Comprehensive Assessment | Advisor: Danni Chang

Beihang University · School of New Media Art and Design 2022.09—2026.06

B.A. in Art | Visual Communication Design (Digital Media)

Average **95.5 / 100** | GPA **3.82 / 4.00** | Advisor: Xiaona Ma | IELTS 6.5

Beihang Youth May Fourth Medal · Only 10 recipients university-wide

02 SELECTED WORK

Publications **9** papers published or accepted by venues including IEEE VR, DRS, Chinese CHI, ICIG, IASDR, and Art and Technology

Selected Publications

01 **IEEE VR 2026** A MR-Mapping System for Guided Self-Correction in Postural Rehabilitation — **First Author**

To address the lack of spatial guidance and real-time feedback in video-based training, this study proposes an MR-based motion-mapping and self-correction system. It integrates Noitom inertial motion capture, virtual–physical body-pose mapping, and visual feedback to help users identify and independently correct movement deviations.

DOI IEEE Xplore: 11489559

02 **Chinese CHI 2024** Participatory Design Research on Community Public Art Based on AI-Generated Content and Projection Mapping — **Second Author**

This study introduces generative AI and projection mapping into the co-creation of community public art. Through participatory workshops, semi-structured interviews, subjective perception scales, and prototype experiments, it develops a participatory process from residents' expression and AI content generation to public-space presentation.

DOI 10.1145/3758871.3758910

03 **DRS 2026** Generative AI in Digital Cultural Heritage Design Workflows: A Systematic Literature Review — **Second Author**

This systematic literature review maps the use of generative AI across digital cultural heritage design workflows, including cultural research, content generation, design translation, interactive presentation, and evaluation, while discussing authenticity, cultural context, design control, and ethical responsibility.

DOI 10.21606/drs.2026.791

03 RESEARCH EXPERIENCE

Future Laboratory, Tsinghua University · Research Center for Sci-Tech Intangible Cultural Heritage | **Research Intern** 2024.08—2025.02

Contributed to the Ministry of Culture and Tourism Key Laboratory project "Integrating Traditional Craftsmanship and Modern Technology in Intelligent Suzhou Embroidery," undertaking cultural and craft research, needs analysis, AIGC customization-platform design, and outcome synthesis.

Participated in the research and prototyping of Yinyu, an immersive VR five-tone healing experience, exploring multisensory expressions of traditional culture in virtual reality.

The related paper, "An Innovative AIGC-Assisted Customization Platform for Suzhou Embroidery," was published in Art and Technology.

Beihang University · State Key Laboratory of Virtual Reality Technology and Systems | **Research Intern** 2024—2025

Investigated embodied motor learning and feedback mechanisms in mixed reality, using a Noitom inertial motion-capture system to collect human-motion data.

Developed virtual–physical pose mapping, movement comparison, and self-correction mechanisms; contributed to research framing, interaction design, system prototyping, user studies, and academic writing.

Related work was published or accepted by IEEE VR 2026, ICIG 2025, and the 14th National Convention on Sport Science of China.

Future Laboratory, Tsinghua University · Lifelong Learning Lab | **Research Intern** 2024.06—2024.09

Participated in research on intelligent learning tools and youth creativity, supporting experimental planning, on-site implementation, and observation of children's creative-learning activities.

Contributed to research-material organization, project reporting, and academic writing, with a focus on how intelligent technologies support learning experience, creative expression, and collaboration among children.

04 PROFESSIONAL & SOCIAL PRACTICE

NetEase Youdao, Beijing | **Course Operations Intern**	2025.08—2025.10	Coordinated tutoring, academic administration, and livestream workflows; developed Python automation scripts with Cursor and vibe coding, reducing recurring tasks from about two hours to five minutes; iterated app, H5, and e-commerce visuals using conversion data.
China Poly Group | **Product Intern · Digital Heritage**	2024.05—2024.10	Contributed to the interactive digital exhibition of a Yuan-dynasty blue-and-white Yuhuchun vase with phoenix-and-floral motifs, translating artifact information and cultural narratives into interactive content. The work premiered at MGM Art Museum in Macao alongside four original Old Summer Palace zodiac heads.
Digital Heritage Global Youth Innovation Challenge | **Competition Operations & Visual Communication Intern**	2026	Supported content planning and operations for an international competition, including workflow coordination, team communication, hosting, and technical support; also assisted with bilingual materials, visual communication, data visualization, and on-site delivery.
